

Industrial Engineer

Location: Las Palmas de Gran Canaria

Vacancy: 1

About the company

Oryx Energies is one of Africa's leading independent suppliers of oil and gas products and services, with a strong track record and presence in 17 countries in sub-Saharan Africa. From our headquarters in Switzerland and our European terminal Oryx Iberia SAU, located in the Port of Gran Canaria, we operate in an international, dynamic and constantly evolving environment.

Oryx Iberia SAU firmly believe in equal opportunities and in the professional and personal development of our team, ensuring a safe, inclusive, and respectful work environment. We foster a culture of collaboration, innovation and continuous improvement.

We are seeking an **Electrical Engineer / Mechanical Engineer / Process Automation Engineer / Industrial Engineer** capable of ensuring safe execution of maintenance works, in line with internal and external procedure guidelines.

Qualifications

- **Education:** Degree in Engineering, preferably **Process automation / Electrical / Mechanical**
- **Experience:** Minimum 3 years' experience in maintenance execution of industrial facilities
- **Languages:** Minimum B2 level English (level test will be conducted)

Key Competencies:

1

Responsibilities

Reporting to the maintenance department management, the selected candidate will be responsible for performing the following duties: manage a preventive and corrective maintenance system aligned with company standards:

- Ensure compliance with legal, supplier, and internal requirements during plan execution.
- Plan, approve, and monitor all maintenance works and permits.
- Execute non-subcontracted maintenance tasks and follow up on work orders.
- Manage and verify the availability of tools and consumables.
- Analyze maintenance inspection results and promote improvement actions to ensure facility reliability.

- Coordinate subcontractor activities efficiently and ensure proper supervision.
- Regularly inspect facilities to identify and report non-conformities.
- Support operations in the correct use of equipment and coordinate maintenance actions.
- Assist in supplier bid evaluations and purchasing processes.
- Maintain and update the maintenance management system.
- Develop standard maintenance procedures for the correct execution of the tasks.

What we offer

- Competitive salary commensurate with experience
- Initial specialised training in Oryx tools and processes, with technical support from day one.
- Job stability with the possibility of a permanent contract after the initial period.
- Competitive benefits package
- Collaborative and multicultural work environment, where initiative, continuous learning and commitment to safety are valued.
